

Founda

Founded by seasoned tech entrepreneurs in February 2019, Founda is a young and well funded company in the health tech & low code / no code space in Amsterdam. We are a passionate group of creators eager to give the healthcare world the technology it requires, against a fair price. We believe money should go to the patient care instead of expensive suppliers with even more expensive lock-ins. Our mission is simple: we aim to make the healthcare world a better place. We plan on achieving this goal by creating tools that allow healthcare innovators to disrupt the healthtech space and improve the lives of billions.

We have been building a technology company using a modern stack with a small team of self-determined developers. We are looking to grow the company with high quality people.

Our technology stack: NodeJS, PostgreSQL, Vue (SSR), AWS (ECS), Docker. We are working on very exciting challenges within our microservices infrastructure, touching serverless, analytics, sorting algorithms, performance sql query tuning... and much more..

This job is full-time.

You'll be based in our Amsterdam office, in the Netherlands. Our office is bilingual, communicating both in English and in Dutch. We are a diverse, international workplace, so anyone is welcome to apply!

Your responsibilities:

- Together with our team of developers, you will work to build and enhance our microservices platform using Typescript and all the love you can give
- You'll help us designing and building components that will enrich our marketplace solution
- Our development team is unlike any other. As a back-end developer you'll work closely with our CTO and senior developer, product manager and CEO.

What We're Looking For

- Back-end fluency – You have a strong understanding of the fundamentals of web development and you're fluent in NodeJS / Typescript
- Clean code – You write readable, maintainable, and well-structured code.
- Deploy early, deploy often – You're skilled at first developing the minimal, most reliable implementation, then iteratively improving it further.

Founda is looking for a back-end developer

- Proactive – You actively participate in delivering a quality product.
- Pride in a job done well – You don't want to just put in your hours and tick off to-dos; you want your work to have a tangible, positive impact.

Founda

What We Offer

- An opportunity to use your skills to build tools that will improve the lives of billions
- An ambitious and motivated team – about 8 colleagues in an inspiring, fast-paced international environment with backgrounds in healthcare, payments and IT
- Room to grow – support in developing your career and yourself
- A pleasant work space – a laptop, a second monitor, a comfortable desk, nice private kitchen
- An office on the canals of Amsterdam
- Close to Amsterdam Vijzelgracht Station
- Equity incentive package
- Competitive Salary

We are so excited to speak with you. Please drop us an email at hello@founda.com, subject line: Back-end Developer.
